Pallet Handling Systems - Pallet Dispensers

Brillopak BK 1500 Series Fork Type Pallet Stackers/Destackers

Usage

The Brillopak BK 1500 Series is designed to automate the stacking and de-stacking of oversize pallets onto the line. By using forks instead of the conventional clamp, the system is able to get a far greater reach.

The fork dispensers come in a range of three models, based on the weight that they can handle.

These pallet dispensers are built with the highest quality components and are designed for 24/7 heavy usage.

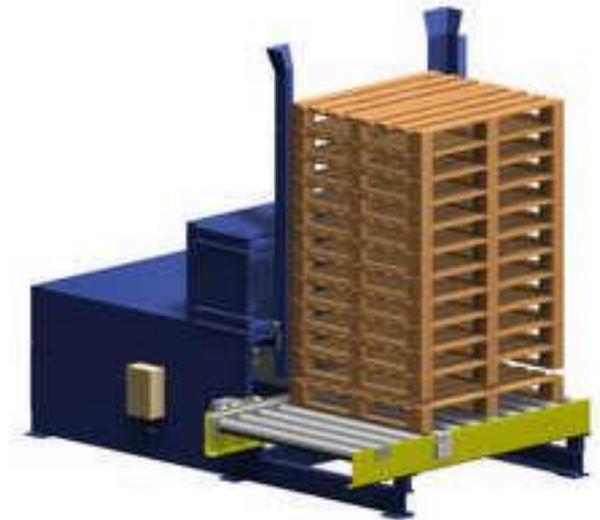

Brillopak pallet dispensers are used by system integrators around the world.

Maximum lifting capacity

BK 1000 can lift weights of up to 250kg

BK 1250 can lift weights up to 500kg

BK 1500 can lift weights up to 1000kg

About Brillopak

Brillopak is a UK manufacturer of high-performance packing and pallet handling machines. Our attention to detail and quality is visible in everything we do from design to install.

We build reliable modular machines that are simple to operate and easy to maintain with future upgrade paths.

Specification across the range

- Automatic dispensing of pallets and stacking of pallets.
- Simple touch screen operation.
- Speed: 180 pallets per hour.
- Discharge elevation: 300mm to 600mm.
- Quiet operation. No need for compressed air on BK 2010E.
- Guides at back of pallet are adjustable to keep different pallet widths on the centre line.
- Places pallet individually, can handle two-way, four-way, Euro, block, winged and stringer pallets.
- Pallet size: Adjustable for pallets from 800mm x 800mm to 1200mm x 1200mm.
- Right angle or in-line configuration.
- Can discharge/feed to customer's existing conveyor.

Compact packing and palletising systems
